

VisuLED HOME lights illuminate the city centre of Aarau

Fountains with accent lighting

Customer/installation engineer:	Stadt Aarau/Eniwa Buchs
Requirement:	Illumination of the fountains and water stream in the old town
Solution:	VisuLED HOME dimmable
Article:	VisuLED HOME and power supply with remote control (Item no. 860106, 860104, 218922)
Quantity:	11 VisuLED HOME, 6 power supply with remote control
Areas of application:	Biotope, garden lounge, attractive accent lighting

Starting situation

Three fountains form the prelude to the Aarau Stadtbach in the pedestrian precinct of the historical old town. The lighting had been installed in 2012 and needed to be replaced. A new lighting installation for the fountain illumination was prepared in cooperation with Eniwa Buchs. With VisuLED HOME from GIFAS installed in the fountains along the water channels, the attractive water feature is now shown to its best advantage and provides discreet lighting in the evening. The entire installation is rated at IP68 and the light intensity can be dimmed as required by remote control.

Customer benefits

- very low power consumption
- long lifetime
- entire installation IP68
- safe installation thanks to extra-low voltage
- dimmable via remote control
